****Key Features:** Metals Inventory Tracking - Portfolio Valuation/Simulation - **Privacy and Security**
www.pocketmetals.app

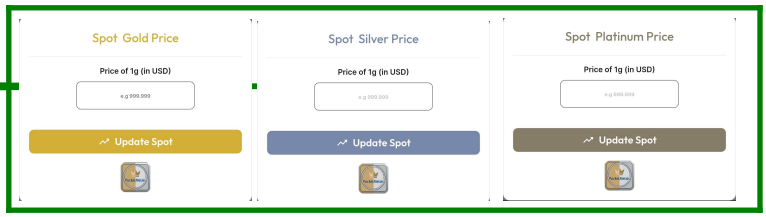

1- Download/Install/homepage of the mobile app PocketMetals.

To download/install the app, depending of your device, you can search for PocketMetals in your store or use direct link:
- For Google play store: https://play.google.com/store/apps/details?id=com.mycompany.pocketmetals
- For Apple store: https://apps.apple.com/us/app/pocketmetals/id6793119828

After you install the app, you create your account till you connect and reach the Homepage.
Here we have a defauld portfolio of 3 articles that we can next remove concerned content.
Below a presentation of the default homepage just after install :

On Top : It shows a Global valuation of the portfolio and per Metal type based on concerned spots that you can update at any time by clicking on it. We can also see Global paid out per metals.

On Middle : It shows a Globalview of the portfolio content in term of Coins, Bars and Jewelries of Gold, Silver and Platinum.

On Bottom : We have on the bottom the last acquisitions.

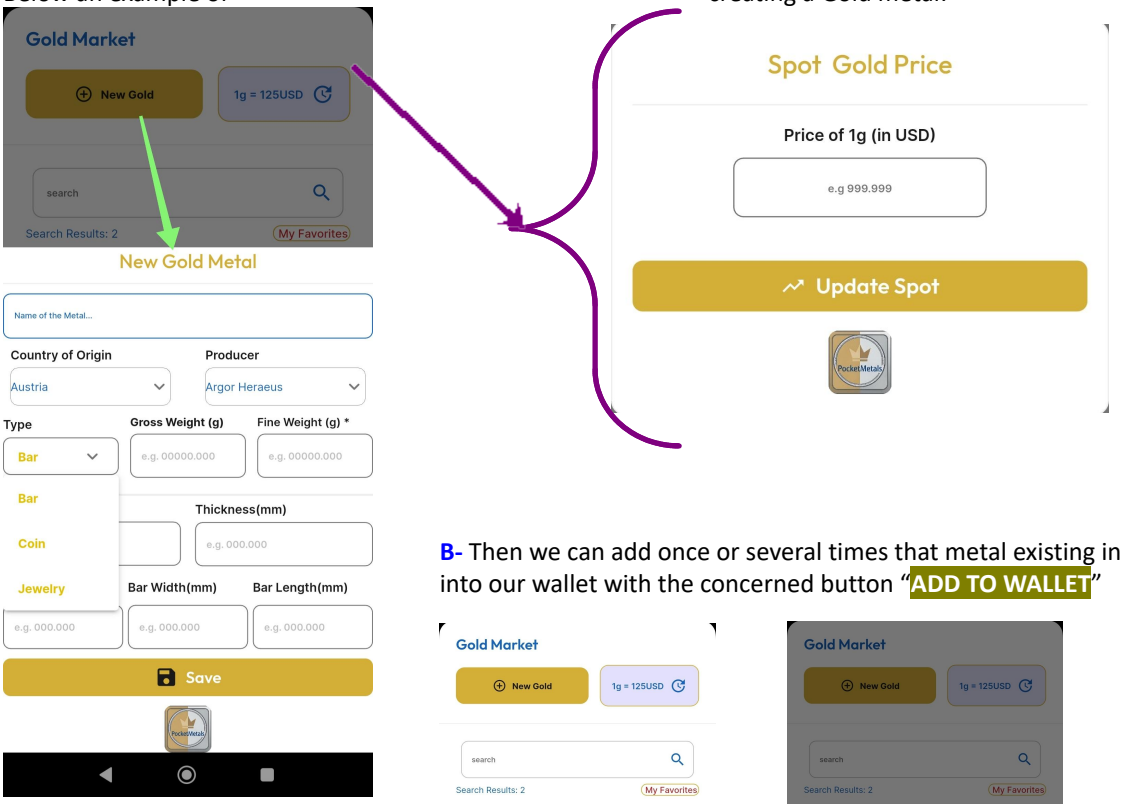

<<Full Details>> This is the link allows managing the Portfolio in term of :
1- Having more details about the portfolio:
2- Abilitty to remove some holdings from the portfolio
We'll see it furthur in this guide

2- How it works

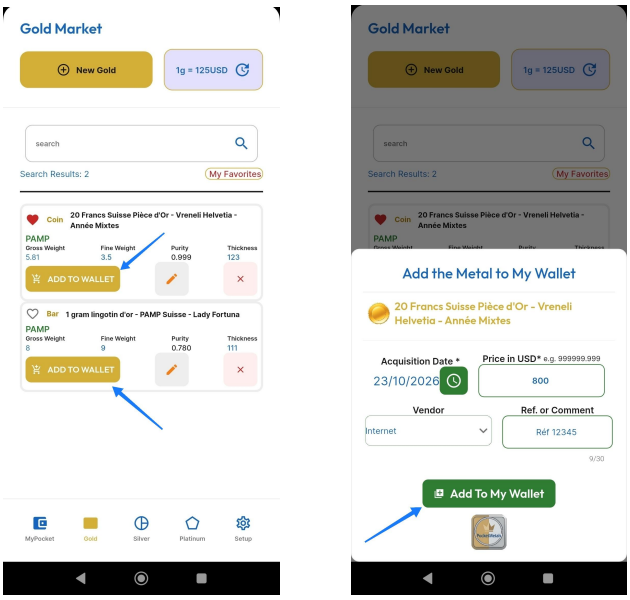

A- First concerned any concerned metalneeds to be recorded in the system, whatever a coin or a bar or a jewelry.

Using bottom menu, It can be a Gold Gold or a Silver Silver or a Platinum Platinum

Below an example of creating a Gold metal:

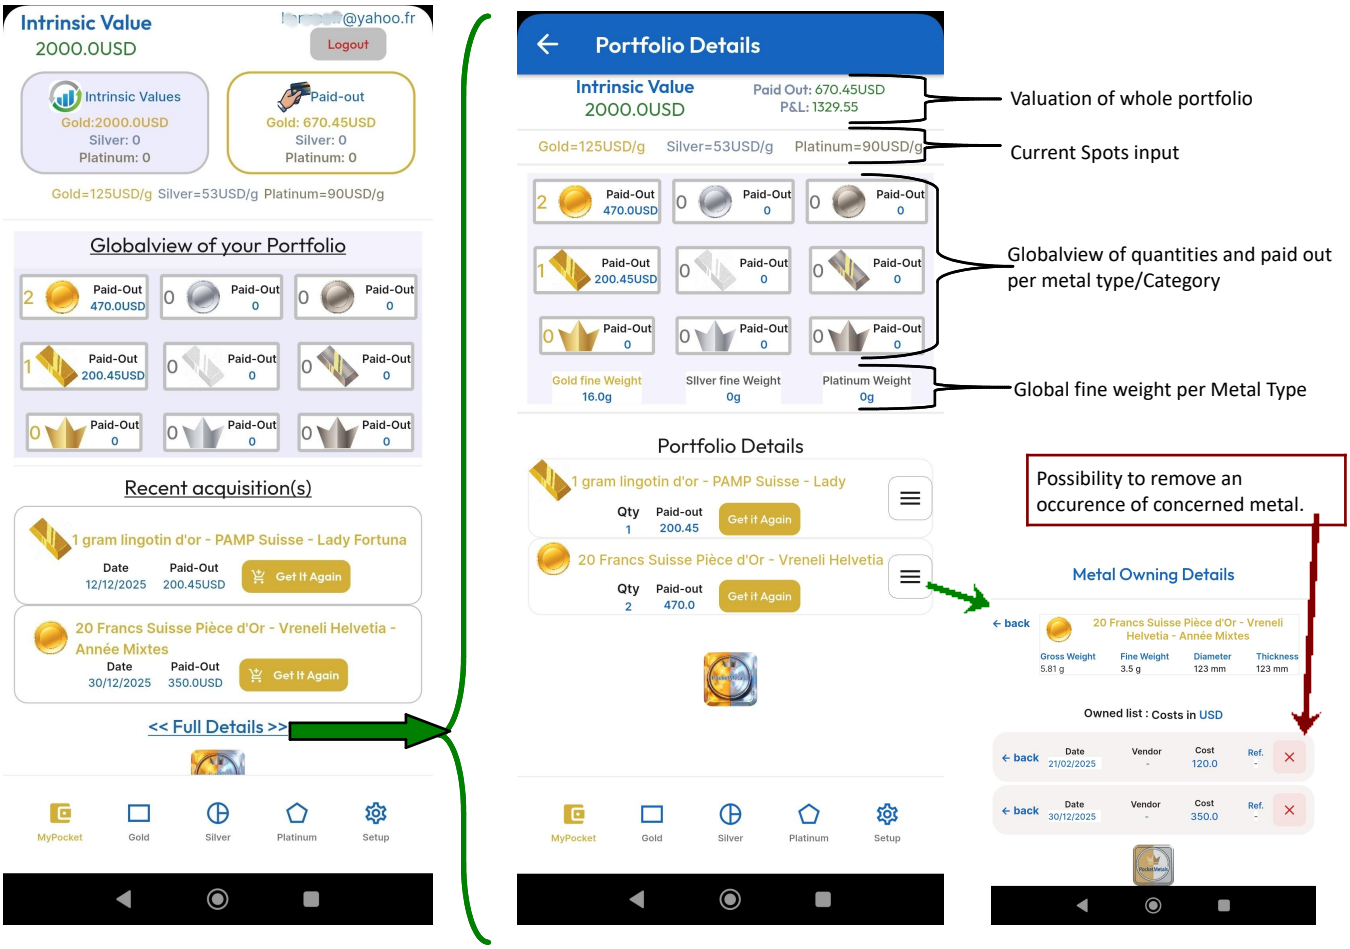

B- Then we can add once or several times that metal existing in the system into our wallet with the concerned button "**ADD TO WALLET**"

C- After we add a Metal in the wallet, that occurence will be listed as part of our Portfolio, then comes managing the portfolio

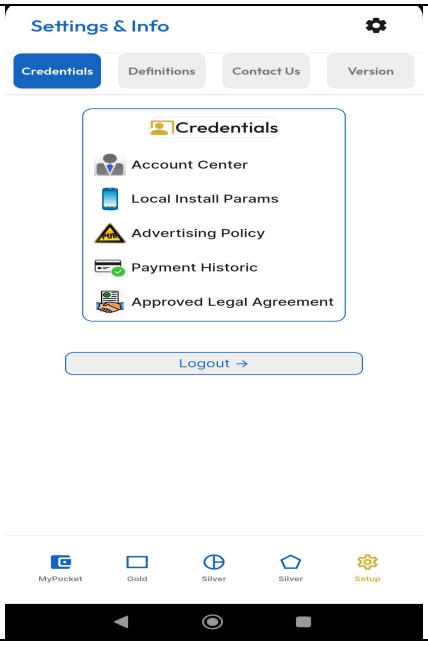

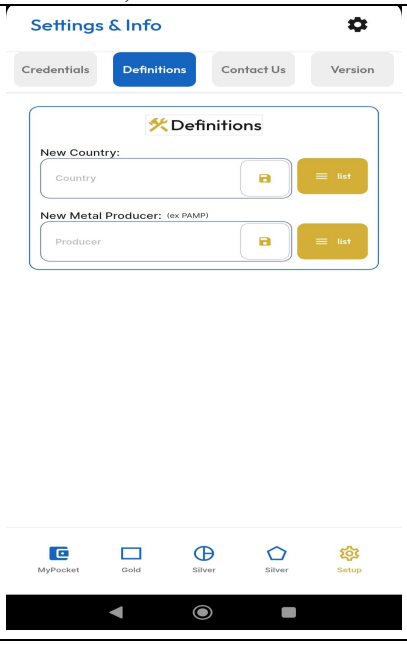

3- Managing the Portfolio.

From Homepage we get access to the page where we get more details about the portfolio and possibility to manage the portfolio thanks to the link **<<Full Details>>**.

4- Setup.

From Setup several configurations can be done.

The Credential gives a lot of opportunities listed as below.	**The Definitions** panel is about adding new countries and Metal Producers, info used for Metals creation.
	

5- Conclusion.

DOWNLOAD Possible from Play Store & Apple Store,
PocketMetals is a mobile application designed specifically for precious metals Actors(Investors, Collectors, etc...) to track, manage, and monitor their metal holdings of Gold, Silver and Platinum, directly from their mobile devices.

**Key Features of PocketMetals:

📊 Metals Inventory Tracking: Allows you to record detailed information about the metals you own, including what you paid for them and specific reference details.

📈 Portfolio Valuation/Simulation: You can input current spot prices to simulate the valorization of your portfolio and track your Profit and Loss (PnL).

🔒 Privacy and Security: Designed with a privacy-first approach—your portfolio data is stored locally on your phone and is only accessible by you.

A lot yet to come in next releases, still to get the stack and self management of own's precious metals smoother and smother.
